The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/551,663	<b>Applicant(s)</b> CHENG ET AL.	
	<b>Examiner</b> Banafsheh Hadizonooz	<b>Art Unit</b> 3715	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Detailed Action***

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Braunberger et al. (US 2003/0077559).

Regarding claims 1-6, Braumnberger discloses an adaptive learning system for presenting appropriate topic and question to the user, said system comprising:

A processor configured to generate and store in a database a set of hierarchical topics (e.g. math) having a plurality of questions associated with each topic, each of the questions having an assigned difficulty level value (See [0012], [0068], figures 1 and 6 and [0028]); determining an adjustable state level for a user based on said user's topic performance consistency; said level having a range of predetermined value (See [0024]-[0025], [0036] and figure 7 ); assigning a difficulty level ranging between 1-100 (e.g. difficulty between 7-2)(See figure 7);determining a relevant topic for said user from said hierarchical topics by evaluating for relevance (See [0028]-[0030] and randomly selecting a relevant question and evaluate the student's performance and the topic's relevance(See [0031]-[0036]) . Braunberger does not specifically disclose showing an adjustable water level as a visual mean for demonstrating user's performance on a specific topic or assigning a threshold range from 0-5. However, the applicant has not

disclosed if such features solve any stated problem or provide any advantage.

Moreover, one of ordinary skill in the art would have expected the invention to work equally well with any other performance demonstration mean. Therefore, it would have been obvious to one of ordinary skill in the art to modify Braunberger's invention to incorporate the performance demonstration method as described by the applicant because such modification is considered to be a matter of design choice.
